

LAB 08 – TASKS (IN CLASS)

Question 1

Write a program in Assembly language using the Irvine32 library that takes 5 integers from the user and counts how many numbers are positive, negative, and zero. Display the results.

Sample Input:

Enter number 1: 5

Enter number 2: -2

Enter number 3: 0

Enter number 4: 9

Enter number 5: -4

Sample Output:

Positive numbers: 2

Negative numbers: 2

Zeros: 1

Question 2

Write a program in Assembly language using the Irvine32 library that takes 5 integers as input, reverses their order, and displays the reversed result.

Sample Input:

Enter 5 numbers: 3 7 1 9 4

Sample Output:

Reversed order: 4 9 1 7 3

Question 3

Write a program in Assembly language using the Irvine32 library that takes 5 integers from the user and finds the largest and smallest numbers. Display both values.

Sample Input:

Enter numbers: 12 5 21 8 3

Sample Output:

Largest number: 21

Smallest number: 3

Question 4

Write a program in Assembly language using the Irvine32 library that takes a word from the user and counts how many vowels and consonants it contains. Display the counts.

Sample Input:

Enter a word: computer

Sample Output:

Vowels: 3

Consonants: 5

Question 5

Write a program in Assembly language using the Irvine32 library that takes a number from the user and calculates its factorial. Display the result.

Sample Input:

Enter a number: 5

Sample Output:

Factorial: 120
